Schedule sessions

Reschedule or cancel sessions

Manage students

When OK is pressed, program will check for overlaps. If everything is okay, the session is scheduled & the user can schedule more sessions in one go. :)

If everything is NOT okay, the LABEL will be updated to the exception that is thrown (what is wrong) :)

RESCHEDULE OR CANCEL SESSION

Semester

Class

Week

This table will have all the sessions for the week selected. When double clicked, another window will open & it will be possible to edit the session. This will reuse the stuff from the previous window (SCHEDULE SESSION). :)))

There will also be a button saying "cancel" that will cancel the session.

You can select a student and then press one of the buttons to decide what to do with him :)))
